ABOUT THE UNIVERSITY

The History

Oklahoma State University (https://go.okstate.edu/about-osu/history.html) was founded as Oklahoma Agricultural and Mechanical College on Dec. 25, 1890, just 20 months after the Land Run of 1889. When the first students assembled for class on Dec. 14, 1891, no buildings, books or curriculum existed.

Land-grant universities were made possible by the Morrill Acts of 1862, 1890 and 1944. They first granted federally controlled land to states to establish "land-grant" colleges. They were designed to be a departure from the typical liberal arts curriculum and a response to the industrial revolution. Land-grant colleges were designed to improve the world through education and research in agriculture, military tactics and mechanical arts.

In 1894, 2 1/2 years after classes began in local churches, 144 students moved into the first academic building — later named Old Central and still located on the southeast corner of campus, housing the Honors College today. In 1896, Oklahoma A&M held its first commencement with six male graduates.

The Smith-Lever Act of 1914 created a cooperative extension service associated with each land-grant institution. OSU has 77 Extension offices (https://extension.okstate.edu/), one in each county. They provide practical, research-based knowledge for improving lives and communities.

In 1990, State University. Technical branches were established in Stillwater, Oklahoma with a population of around 50,000. Stillwater is approximately 60 miles from the Tulsa and Oklahoma City metropolitan areas and is readily accessible by interstate highway and air. Stillwater Regional Airport added daily air service to Dallas in 2016.

The university has an enrollment of more than 33,500 students on five campuses. It offers bachelor’s, master’s and doctoral degrees in many fields, as well as Doctor of Osteopathic Medicine and Doctor of Veterinary Medicine degrees. Specialist in Education degrees are also offered in select fields.

Although OSU is a large, comprehensive university, its size does not diminish the personal attention each student receives. The individual is more than just a number at OSU. Students can count on personal attention in a friendly environment.

As a comprehensive land-grant institution, OSU offers many distinct advantages: nearly four million volumes in the library’s collection; modern research laboratories and equipment; excellent physical education, recreation and student union facilities; more than 500 student organizations; nationally recognized residence hall programs; outstanding cultural and athletic events; and 45 nationally affiliated fraternities and sororities that provide a stimulating educational and social environment.

The Strategy

As a comprehensive land-grant institution, OSU offers many distinct advantages: nearly four million volumes in the library’s collection; modern research laboratories and equipment; excellent physical education, recreation and student union facilities; more than 500 student organizations; nationally recognized residence hall programs; outstanding cultural and athletic events; and 45 nationally affiliated fraternities and sororities that provide a stimulating educational and social environment.

In October 2022, OSU released its strategy (https://go.okstate.edu/about-osu/leadership/president/strategic-plan/) to become the nation’s preeminent land-grant institution. The plan is deeply rooted in the
university’s land-grant mission to serve the public good. Included in the plan are eight policy imperatives that include, among others, decreasing student debt through scholarships, new enrollment goals and a commitment to creating graduates who exhibit the four competencies of 1) professional preparedness, 2) engaged citizenship, 3) ethical leadership and 4) personal responsibility. The strategy also lays out a plan to capitalize on the intersection of the university’s research strengths with society’s greatest needs.

Student Profile
OSU has a diverse student body. Students come from Oklahoma, across the nation and around the world. Of OSU’s more than 33,500 students, approximately 73% are on the Stillwater campus, including students at the College of Veterinary Medicine (https://vetmed.okstate.edu/). The remaining student population is spread over OSU-Oklahoma City (https://osuokc.edu/), OSU Institute of Technology (https://osuit.edu/), OSU-Tulsa (https://tulsa.okstate.edu/) and the OSU Center for Health Sciences (https://medicine.okstate.edu/).

More than 76% of the undergraduates enrolled are Oklahoma residents. International undergraduates consist of 2% and are from 58 foreign countries. The total international enrollment is from 99 countries. Of the undergraduate population, 52% are women. U.S. minorities make up approximately 34% of the undergraduate student body. The six-year graduation rate of full-time, degree-seeking undergraduates is 65% for OSU-Stillwater and OSU-Tulsa.

There are 4,988 graduate students throughout the OSU system. Over 3,600 of those students are on the Stillwater campus. Of the graduate students on all campuses, 43% are Oklahoma residents, 35% are out-of-state residents and 22% are from foreign countries. Graduate students are equally divided by gender. U.S. minorities make up 22.5% of the graduate student body.

An annual report regarding gender equity in OSU’s athletic programs is available upon request from the Athletic Department (https://okstate.com/).

Research
Research has been one of the three essential components of the OSU mission since the University’s inception. Research adds richness, depth and broader impact to the other mission components of teaching and outreach. In the sciences and engineering, basic research advances the frontiers of disciplinary knowledge; whereas, applied research improves quality of life and economic prosperity by bringing new products, processes and medicines to the marketplace. Research and creative innovations within the arts and humanities enhance how human beings view and understand the world we live in.

OSU’s faculty and students are engaged in research across the full spectrum of human endeavor and inquiry, including areas of state and national priority. In addition to disciplinary research in virtually all academic units on campus, OSU is strong in several areas of interdisciplinary research. Researchers involved in next generation sustainable energy span agricultural innovation, nutrition, engineering, toxicology, geosciences, economics and the social/behavioral sciences. OneHealth is an interdisciplinary framework that recognizes the interconnections between human health, animal health and a healthy planet. OSU OneHealth includes research as diverse as pandemic preparedness, veterinary medicine, ecology, psychology, exercise science and bioengineering—as well as basic research in the bench sciences. Unmanned systems research (including unmanned aircraft) brings researchers from several engineering disciplines together with experts in production agriculture, computer science, information systems and aviation education to create platforms, sensors, data management tools and new applications for this burgeoning field. Such interdisciplinary research strengths are enhanced by big data solutions, including OSU’s high performance computing facilities and advanced analytical expertise. Other strength areas include transportation, rural renewal, wheat and sod science, and factors associated with the opioid crisis.

The Division of the Vice President for Research administers research across the OSU System. The division is comprised of the following units:

The Research Administration office (research.okstate.edu) is responsible for research governance, operations and special programs including the OSU Researchers’ Reception, the Regents Distinguished Research Awards, the President’s Fellows Faculty Research Award, the Otto S. Cox Graduate Fellowships for Genetics Research and the Niblack Research Scholars program. Other areas administered by the office include complaints of scientific misconduct, core facilities and facilities renovation/development programs, University cost-share and University research start-up programs.

The Office of University Research Compliance (research.okstate.edu/research-compliance) ensures OSU follows federal, state and University regulations that set forth requirements for certain kinds of research. Working through faculty committees, it oversees research involving human subjects, animal models, radiological materials, certain hazardous agents and recombinant DNA.

Central Sponsored Programs Administration (https://research.okstate.edu/faculty-resources/central-sponsored-programs-admin.html) is the document control center for the routing of all proposals and awards throughout the University. It provides support to faculty and staff (through information about funding opportunities and training seminars); manages campus-wide electric research administration systems (e.g., proposal submission, funding notification, and administration of awards); manages limited submission competitions; and posts online research expenditures. Additionally, contracting specialists provide guidance for compliance with federal export control regulations that govern the conduct of research and export of specific technologies.

The Office of Technology Commercialization (cowboyinnovations.okstate.edu/for-innovators) manages OSU’s innovative technologies and other intellectual property for the benefit of the University and the public. In carrying out this mission, personnel work with faculty, staff, administrators and students to protect OSU’s intellectual property and license it to commercial firms.

The Division of the Vice President for Research is also home to several core research facilities. The High Performance Computing Center (hpcc.okstate.edu) provides supercomputing services and computational science expertise that enables faculty, staff and students to conduct a wide range of focused research, development and test activities. Its main objective is to facilitate research and aid in educational advancement by integrating state-of-the-art high performance computing technology for multidisciplinary units across the OSU campus and throughout Oklahoma. The Oklahoma State University Microscopy Laboratory (research.okstate.edu/microscopy) is a multi-user instrumentation facility for materials research spanning from nanotechnology to biology.
and medicine. Analytical capabilities include microscopy via electron beams, force probes and visible light, as well as nanomechanical and nanotribological probes. OSU’s Animal Resources (research.okstate.edu/animalresources) handles the centralized housing and husbandry of animals utilized in research, and oversees the veterinary care of all OSU animals used for teaching testing and research.

Research Centers and Facilities
OSU has multiple research centers and facilities across the Stillwater campus and throughout the state.

The NSF Established Program to Stimulate Competitive Research (EPSCoR) program leads a statewide initiative that conducts cutting edge research while building Oklahoma’s talent pipeline in STEM fields (http://okepscor.org).

The Oklahoma Center for Respiratory and Infectious Diseases (ocrid.okstate.edu) works toward understanding and treatment of a major health problem in the U.S.

The Center for Integrative Research on Childhood Adversity (circaok.com), a collaboration between OSU and the OSU Center for Health Sciences in Tulsa, is establishing the linkages between childhood difficulties and later physical health.

The Unmanned Systems Research Institute (ceat.okstate.edu/mae/research/usri) brings together researchers from all over the university and the state to advance unmanned aerial systems and related technologies and applications.

The Robert M. Kerr Food & Agricultural Products Center (food.okstate.edu) provides large and small businesses, producers and entrepreneurs access to faculty and staff with expertise in business and technical disciplines. The FAPC seeks to develop successful value-added enterprises in Oklahoma.

The Oklahoma Water Resources Center (water.okstate.edu) aims to understand and manage Oklahoma water resources and resolve Oklahoma water issues by conducting research and disseminating the resulting knowledge. With expertise in a variety of disciplines, more than 80 faculty members across campus are involved in the Center’s activities.

The Helmerich Advanced Technology Research Center (tulsa.okstate.edu/helmerich) is a state-of-the-art research, development, testing and education center located on the OSU-Tulsa campus. Faculty from mechanical engineering, electrical engineering and materials science and engineering work collaboratively there on research and graduate education.

The Henry Bellmon Research Center houses six of OSU’s leading interdisciplinary research programs: synthetic chemistry, biodiversity, biophysics, photonics, bioinformatics and biogeophysics. These are but a few of OSU’s research centers and facilities; for other examples and more detailed information, visit https://research.okstate.edu/centers-and-institutes.html.

Outreach
Oklahoma State University’s long and proud tradition of excellence in outreach and community engagement is rooted in its beginnings as a land grant institution. That heritage is demonstrated through engagement in the hundreds of educational and research programs seeking to solve problems and help people thrive in the state, nation and around the world. Every academic college on the OSU campus is engaged in outreach programs (https://outreach.okstate.edu) that include noncredit professional development, education opportunities for young children to the elderly, and technical assistance services to support business and economic growth.

Office of Individual Study
OSU Individual Study undergraduate courses provide a self-paced, independent, and online format for individuals with busy schedules and who desire a more flexible format such as those working full time, juggling family responsibilities, and/or military members. Individual Study students may be in-state, out of state or out of country students and do not have to be admitted to OSU.

Yearlong courses have open start dates so students may begin a course anytime they wish. OSU students can also enroll in individual study semester length classes. Please check with your advisor. Courses are delivered through the OSU learning management system, Canvas; however, students who do not have Internet access can participate in courses using print-based materials.

Call 405-744-6390 or visit is.okstate.edu (http://is.okstate.edu) for class descriptions, costs, and enrollment information.

For information on all OSU online courses and degrees, visit osuonline.okstate.edu (http://osuonline.okstate.edu), call 405-744-1015, or email osuonline@okstate.edu.

Accreditation
Oklahoma State University is accredited by the Higher Learning Commission (HLC). Programs within the colleges also hold area accreditation. The HLC may be reached at:
230 South LaSalle Street, Suite 7-500
Chicago, IL 60604-1411
Phone: 800.621.7440/312.263.0456
Fax: 312.263.7463
info@hlcommission.org

In the College of Arts and Sciences, the chemistry program is certified by the American Chemical Society; the program in communication sciences and disorders is accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology of the American Speech-Language-Hearing Association; the School of Media and Strategic Communications, which offers programs in multimedia journalism, sports media, and strategic communication, is accredited by the Accrediting Council on Education in Journalism and Mass Communications (ACEJMC); the Clinical Laboratory Sciences program is accredited by the National Accrediting Agency for Clinical Laboratory Sciences; the Greenwood School of Music is accredited by the National Association of Schools Music (NASM); the program in clinical psychology is accredited by the American Psychological Association and the Psychological Clinical Science Accreditation System; and the Department of Theatre is accredited by the National Association of Schools of Theatre (NAST).

In the College of Education and Human Sciences the Office of Educator Support (OES) is accredited as an NCATE Legacy Site; the unit adheres to the Council for the Accreditation of Educator Prep (CAEP) accreditation standards at the national level and the Office of Educator Quality and Accountability standards in Oklahoma. OSU had its joint CAEP/OEQA accreditation visit Spring 2022 with results expected in Fall 2023. Each OES program area is accredited as well. In Secondary Education
the Social Studies Education options are recognized by the National Council for the Social Studies (NCSS) Specialized Program Area (SPA). The English Education option is recognized by the National Council for the Teaching of English (NCTE) SPA, and the Foreign Language Education option is recognized by the American Council on the Teaching of Foreign Languages (ACTFL) SPA. The Mathematics Education option is recognized by the National Council of Teachers of Mathematics (NCTM) SPA and the Science Education option is recognized by the National Science Teachers Association (NSTA) SPA. The Educational Leadership master's (building level) and doctoral (district level) programs are recognized by the National Policy Board for Educational Administration (NPBEA) under Educational Leadership Constituent Council (ELCC) standards, now called the National Educational Leadership Preparation (NELP) standards. The School Psychology program is recognized by the National Association of School Psychologists (NASP) SPA and accredited by the American Psychological Association (APA). The Counseling Program with options in Mental Health Counseling and School Counseling are accredited by the Council for Accreditation of Counseling and Related Education Programs (CACREP). The School Administration EdD, the Educational Administration Ph.D., and the Master of Science in School Administration are full voting members of the University Council for Educational Administration (UCEA), a member organization of the National Policy Board for Educational Administration (NPBEA). The Commission for Educator Quality and Accountability through Oklahoma's Office of Educator Quality of Accountability (OQEA) has approved the following initial certification programs: Early Childhood Education, Elementary Education, Family and Consumer Sciences Education, and the Art Education certification pathway. For advanced certification programs, OQEA has approved the master's in Education Technology School Library-Media option, and the Reading & Literacy Education (Reading Specialist) masters.

The Child Development Laboratory is licensed by the Oklahoma Department of Human Services (DHS) and has received a Three Star Differential Quality Certification from the Department of Human Services. The Child Development Lab School is also accredited by the accrediting branch of the National Association for the Education of Young Children (NAEYC). The Marriage and Family Therapy program is accredited by the Commission on Accreditation for Marriage and Family Therapy Education (COAMFTE) The Family Financial Planning Master of Science, graduate certificate, and undergraduate certificate are Certified Financial Planner Board of Standards registered programs. The Recreational Therapy Program is accredited by the Committee on Accreditation of Recreational Therapy Education (CARTE) through the Commission on Accreditation of Allied Health Education Programs (CAHEP), which is accredited by the Council on Higher Education Accreditation (CHEA). The Recreation Management program is accredited by the Council on Accreditation of Parks, Recreation, Tourism, and Related Professions (COAPRT), which is accredited by the Council on Higher Education Accreditation (CHEA). The RN to BSN Nursing program is accredited by the Commission on Collegiate Nursing Education (CCNE). The Didactic Program in Dietetics and the Dietetic Internship at OSU are both currently granted accreditation until 2028 by the Accreditation Council for Education in Nutrition and Dietetics of the Academy of Nutrition and Dietetics, 120 South Riverside Plaza, Suite 2190, Chicago, IL 60606-6995, ph. 312.899.0040 ext. 5400. The Council for Interior Design Accreditation (CIDA) has accredited the undergraduate interior design program since 1984. The pre-production and the production management apparel curricula are endorsed by the American Apparel and Footwear Association (AAFA) Education Foundation, making it one of only 13 approved programs in North America. The Fashion Design and Production and Fashion Merchandising programs are accredited by the Textile and Apparel Programs Accreditation Commission (TAPAC), one of only three schools accredited in the United States.

In the College of Engineering, Architecture and Technology, bachelor's degree programs are accredited by nationally recognized accreditation organizations. Programs in aerospace engineering, architectural engineering, biosystems engineering, chemical engineering, civil engineering, computer engineering, electrical engineering, industrial engineering and management, and mechanical engineering are individually accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org. Programs in construction engineering technology, electrical engineering technology, fire protection and safety engineering technology, and mechanical engineering technology are individually accredited by the Engineering Technology Accreditation Commission of ABET, http://www.abet.org. The Bachelor of Architecture degree is accredited by the National Architectural Accrediting Board (NAAB).

In the Ferguson College of Agriculture, the undergraduate program in biochemistry and molecular biology is accredited by the American Society for Biochemistry and Molecular Biology. The undergraduate forestry ecology and management option of the natural resource ecology and management major is accredited by the Society of American Foresters. The landscape architecture program (Bachelor of Landscape Architecture) is accredited by the American Society of Landscape Architects (ASLA). The professional education program in agricultural education is accredited by the Council for the Accreditation of Educator Preparation (CAEP) formerly known as the National Council for Accreditation of Teacher Education (NCATE). In addition, the undergraduate biosystems engineering program is accredited by the Engineering Accreditation Commission of ABET (http://www.abet.org) under criteria for biological engineering and similarly named programs.

The Spears School of Business is accredited by AACSB International —The Association to Advance Collegiate Schools of Business, which is the premier accrediting agency for bachelor’s, master’s, and doctoral degree programs in business administration and accounting. AACSB International accreditation represents the highest standard of achievement for business schools worldwide. Institutions that earn accreditation confirm their commitment to quality and continuous improvement through a rigorous and comprehensive peer review process. All Spears programs are AACSB accredited. In addition, the School of Accounting is supplementally accredited by the AACSB. There are only 189 schools world-wide that have attained this status for both business and accounting programs.

The College of Veterinary Medicine is fully accredited by the American Veterinary Medical Association’s Council on Education. The Oklahoma Animal Disease Diagnostic Laboratory is accredited by the American Association of Veterinary Laboratory Diagnosticians, and the Boren Veterinary Medical Teaching Hospital is accredited by the American Animal Hospital Association.

The animal care programs of the College of Veterinary Medicine, the College of Education and Human Sciences, and the College of Engineering, Architecture and Technology are accredited by the Association for the Assessment and Accreditation of Laboratory Animal Care, International (AAALAC). AAALAC International is a private, nonprofit organization that promotes the humane treatment of animals in science through voluntary accreditation and assessment programs. AAALAC International accreditation shows that an institution is serious about setting, achieving and maintaining high standards for animal care and use and is committed to animal welfare in science. AAALAC International
offers the only international accreditation for animal care and use programs, and it has become recognized around the world as a sign of quality science.

Programs at OSU's branch campuses have also received accreditation from national agencies.

The College of Osteopathic Medicine at the Center for Health Sciences is accredited by the Commission on Osteopathic College Accreditation (COCA) of the American Osteopathic Association.

Programs at OSU-Tulsa are fully accredited by the Higher Learning Commission, carrying the same accreditation as programs on the Stillwater campus. Refer to individual colleges for the specific agencies. Refer to the appropriate college sections in this Catalog for further information on accreditation of specific programs.

Students complete general education courses in a broad variety of areas: analytical and quantitative thought (A), diversity (D), humanities (H), international cultures (I), natural sciences (N), and social and behavioral sciences (S). One of the natural sciences courses must have a scientific investigation (L) designation. A course is qualified to be part of the general education curriculum if it meets the needs of students in all disciplines without requiring extensive specialized skills and satisfies all the criteria for a specific general education area. The requirements for each general education area follow:

General Education Area Designations

ANALYTICAL AND QUANTITATIVE THOUGHT - (A)

Purpose:

Courses designated “A” incorporate the study of systems of logic and the mathematical sciences with a primary emphasis on inductive and/or deductive processes.

Requirements:

Students will critically analyze and solve problems using quantitative, geometric, or logical models.

Students will form inferences using logical systems and mathematical information and communicate them effectively.

Students will give appropriate multiple representations (symbolical, visual, graphical, numerical, or verbal) of logical or mathematical information.

DIVERSITY - (D)

Purpose:

Courses designated “D” prepare students for engaged citizenship in the diverse, multicultural society of the United States.

Requirements:

Students will reflect on identity through the examination of one or more underrepresented groups (e.g. racial, ethnic, religious, social class, gender, age, disability, sexual orientation) in present day United States.

Students will examine the ways underrepresented groups define and express themselves and the context in which these definitions are constructed.

Students will critically analyze theories and systems of cultural, societal, political, or economic power.

Students will demonstrate their understanding through written work that provides them the opportunity to enhance their writing skills; upper division "D" courses will include extensive written work.

1. Writing assignments must be weighted in the grading scheme such that students are discouraged from skipping the assignment (i.e. writing assignments are worth a minimum 10% of the overall grade).

2. Writing assignments must be tied to the purpose/requirements of the “D” designation.

3. The minimum required number of pages may be encompassed in one or multiple assignments. Informal writing assignments (like journals or class notes) and group projects will not count toward writing minimum. Multiple drafts of the same work cannot be counted twice in the cumulative page minimum.

4. Lower-division courses must include at least five pages of out-of-class written assignments or essays.

5. Upper-division courses must include at least ten pages of out-of-class written assignments or essays. Instructors must provide feedback that students can incorporate in subsequent writing assignments (by revising and resubmitting a single assignment or submitting multiple assignments). At least one writing assignment must be at least four pages in length.

In courses worth three or more credit hours, at least one-half of the course materials must relate to one or more underrepresented groups. A course that is fewer than three hours must be entirely devoted to these groups. A detailed class schedule should be included on the course syllabus to confirm content minimum has clearly been met.

HUMANITIES - (H)

Purpose:

Courses designated “H” concentrate on the expression, analysis, and interpretation of ideas and the aesthetics or values that have formed and informed individuals and societies.

Requirements:

Students will critically analyze the relationships of aesthetics, ideas, or cultural values to historic and contemporary cultures.

Students will develop an understanding of how ideas, events, arts, or texts shape diverse individual identities.

Students will demonstrate their understanding through written work that provides them the opportunity to enhance their writing skills; upper division “H” courses will include extensive written work.

1. Writing assignments must be weighted in the grading scheme such that students are discouraged from skipping the assignment (i.e. writing assignments are worth a minimum 10% of the overall grade).

2. The minimum required number of pages may be encompassed in one or multiple assignments. Informal writing assignments (like journals or class notes) and group projects will not count toward writing minimum. Multiple drafts of the same work cannot be counted twice in the cumulative page minimum.

3. Lower-division courses must include at least five pages of out-of-class written assignments or essays.
Courses designated “I” prepare students for engaged citizenship in today’s global society through understanding of cultural perspectives outside the United States. Courses concerning ethnic and cultural minorities within the U.S. do not qualify.

Requirements:

Students will examine current interactions of groups or cultures external to the United States within their political, economic, ideological, or natural contexts.

Students will understand how current international cultures relate to complex, systems related to oppression, political ideology, globalization, or other similar dynamics.

Students will demonstrate their understanding through written work that provides them the opportunity to enhance their writing skills; upper division “I” courses will include extensive written work.

1. Writing assignments must be weighted in the grading scheme such that students are discouraged from skipping the assignment (i.e., writing assignments are worth a minimum 10% of the overall grade).

2. Writing assignments must be tied to the purpose/requirements of the “I” designation.

3. The minimum required number of pages may be encompassed in one or multiple assignments. Informal writing assignments (like journals or class notes) and group projects will not count toward writing minimum. Multiple drafts of the same work cannot be counted twice in the cumulative page minimum.

4. Lower-division courses must include at least five pages of out-of-class written assignments or essays.

5. Upper-division courses must include at least ten pages of out-of-class written assignments or essays. Instructors must provide feedback that students can incorporate in subsequent writing assignments (by revising and resubmitting a single assignment or submitting multiple assignments). At least one writing assignment must be at least four pages in length.

In courses worth three or more credit hours, at least one-half of the course materials must relate to international cultural perspectives on the present times. A course that is fewer than three credit hours must be entirely devoted to these groups. A detailed class schedule should be included on the course syllabus to confirm content minimum has clearly been met.

Courses designated “L” emphasize evaluating scientific hypotheses through the scientific inquiry process and must include the equivalent of at least one semester credit hour of physical or biological laboratory experience.

Requirements:

Students will critically analyze scientific problems, formulate hypotheses, conduct appropriate experiments, and summarize and interpret results.

Students will communicate procedures, results and conclusions through written work appropriate to the discipline.

Courses designated “S” feature the systematic study of physical or biological processes and the mechanisms and consequences of human intervention in those processes.

Requirements:

Students will understand the scientific inquiry process.

Students will use the methodologies and models of science to define, evaluate, and solve problems in biological and physical sciences.

Students will evaluate evidence, interpretations, results, and solutions related to the physical and biological sciences.

Students will understand the consequences of human intervention in physical and biological processes and mechanisms.

Students will demonstrate their ability to communicate in a manner appropriate to the discipline through written assignments.

Courses designated “N” feature the systematic study of physical or biological processes and the mechanisms and consequences of human intervention in those processes.

Requirements:

Students will critically analyze scientific problems, formulate hypotheses, conduct appropriate experiments, and summarize and interpret results.

Students will communicate procedures, results and conclusions through written work appropriate to the discipline.

Courses designated “L” emphasize evaluating scientific hypotheses through the scientific inquiry process and must include the equivalent of at least one semester credit hour of physical or biological laboratory experience.

Requirements:

Students will critically analyze scientific problems, formulate hypotheses, conduct appropriate experiments, and summarize and interpret results.

Students will communicate procedures, results and conclusions through written work appropriate to the discipline.
that students can incorporate in subsequent writing assignments (by revising and resubmitting a single assignment or submitting multiple assignments). At least one writing assignment must be at least four pages in length.

Effective Fall 2020, all new requests for General Education designations must meet the purpose and all requirements in this document. Courses with approved General Education designations will retain the General Education designation until their next review. When the General Education Advisory Council next reviews the course the course must satisfy the purpose and all requirements to retain the General Education designation. If the designation(s) is denied during a review, the course will retain the designation(s) for one year during which time the course can be revised and resubmitted for reconsideration.

Athletic Programs Mission
Oklahoma State University is committed to providing regionally and nationally competitive athletics programs as an integral part of the overall educational mission of the University. Sponsored programs comply with the highest recognized standards of the institution and the athletic governing bodies. Intercollegiate athletics operate in harmony with the University’s stated mission and are committed to the intellectual, cultural, physical and social development of the student-athletes as individuals. Opportunities for student-athletes are provided without discrimination. OSU is a member of the highly competitive Big 12 Conference.

Facilities
The OSU campus is one of exceptional beauty with its many modified Georgian-style buildings set against immaculate landscaping. The main campus encompasses more than 200 permanent buildings on 840 acres. Notable facilities include the Edmon Low Library (https://go.okstate.edu/about-osu/traditions/edmon-low-library.html), one of the largest in the Southwest, and Old Central, the university’s first permanent structure on campus. Lovingly restored, Old Central continues to hold court on the southeast side of campus and houses the Honors College (https://honors.okstate.edu/).

OSU boasts an extremely comprehensive Student Union (https://union.okstate.edu/). Thanks to a $63 million facelift, the Student Union offers greatly enhanced facilities and services to students. Campus Life (https://campuslife.okstate.edu/) is prominently located on the second floor, and dining options have been enhanced and expanded. The Student Services Center in the Union houses the Bursar (https://bursar.okstate.edu/), Registrar (https://registrar.okstate.edu/), Hargis Leadership Institute (https://leadershipinstitute.okstate.edu/), Campus Life (https://campuslife.okstate.edu/), Scholarship and Financial Aid (https://go.okstate.edu/scholarships-financial-aid/), Undergraduate Admissions (https://go.okstate.edu/admissions/) and New Student Orientation and Enrollment (https://firstyearexcellence.okstate.edu/) in one convenient location. In 2016, the Student Union’s Atherton Hotel (https://www.athertonhotelatoksu.com/) received a major renovation that enlarged its rooms and upgraded its accommodations.

In 2006, OSU launched its campus Master Plan 2025, calling for more than $850 million in projects to improve facilities in four areas: academics, student life, infrastructure and athletics. The historic, far-reaching plan continues to transform the OSU campus.

Newest Additions
The New Frontiers Agricultural Hall (https://agriculture.okstate.edu/about/new-frontiers/) will be a $115.2 million, 184,000 square-foot building that will house the Ferguson College of Agriculture (https://agriculture.okstate.edu/). The new home will strengthen OSU Agriculture’s research, teaching and Extension missions while addressing two key challenges: attracting and retaining scientific leaders and equipping collaborative teams with state-of-the-art laboratory and field facilities. It will redefine what is possible for faculty, students and the industries and communities that depend on their research. It will prioritize experiential teaching, flexible research and a strong sense of community through strategically designed spaces. There will be expanded space and presence for student organizations, including the Student Success Center, which coordinates on-campus career fairs and other activities with more than 60 student organizations. The facility is being created with modern teaching methods in mind, utilizing flexible lab spaces to serve multiple disciplines. It will change and modernize how research is conducted and how scientific subjects are taught. Featuring numerous interactive classrooms to harness students’ energy and the excitement of innovation, the New Frontiers Agricultural Hall will be a space that fosters learning and collaboration.

The $28.9 million renovation and expansion for Engineering South (https://ceat.okstate.edu/mae/engineering-south.html) will be complete in July 2023 and will be occupied for the 2023 fall semester. This historic structure has been the home for various departments within the College of Engineering, Architecture and Technology (https://ceat.okstate.edu/) since 1939. All four floors of the interior will be gutted and redesigned to propel Engineering South into the 21st century. The Electrical and Computer Engineering (ECE) department will occupy the second floor and the Mechanical Aerospace Engineering (MAE) department will occupy the third floor. Upgrades to the public first floor will be department-focused spaces with a goal to create a strong ECE and MAE community, encourage and support our teaching and research missions, brand ECE and MAE as leaders in high-tech innovation, and attract the brightest students and faculty. The fourth floor provides an exciting opportunity for CEAT innovation and growth, including an open design studio for collaborative senior design, a design and innovation laboratory and seminar room for laboratory intensive courses, additional office space for teaching and research assistants, and gathering and study spaces for ECE and MAE students and student organizations. The Zink Center for Competitive Innovation and the new 207-seat Chickasaw STEM auditorium will provide CEAT with new programming and innovative spaces to elevate student learning and success.

Construction for the $22 million Central Market Place (https://news.okstate.edu/articles/communications/2023/construction_to_begin_on_osus_new_central_market_place_to_replace_kerr-drummond_complex.html) started in April 2023 and is scheduled to open in fall 2024. This new 31,000-square-foot facility will have the capacity to house nearly 300 guests and will feature food concepts in Byte, Caribou Coffee, 405 Deli and 1890 Market all in a modern, open seating atmosphere that includes a covered patio area with views of campus activities. Byte will be a unique “ghost kitchen” concept that will serve a rotating menu of diverse offerings. This can be thought of as a virtual restaurant operating as a digital storefront. The guest places their order via an app or kiosk and the food is prepared in the back of the house and delivered through a locker-style system. Caribou Coffee will be just like its counterpart in the Student Union. 405 Deli made its campus debut in the Kerr-Drummond dining complex during the fall 2022 semester and will transition over to Central Market Place. This self-branded sandwich concept offers a Stillwater-inspired menu.
consisting of gourmet sandwiches and salads. The 1890 Market is a rebranding of OSU’s largest on-campus convenience store currently operating in Kerr-Drummond — Twenty Something. As with all University Dining Services campus convenience stores, the 1890 Market will house a selection of groceries, grab-and-go items, snacks and necessities. This convenience store will have increased shopping space providing an expansive selection of products.

The new $100 million Human Performance and Nutrition Research Institute (HPNRI) (https://go.okstate.edu/hpnri/) will be constructed on the Stillwater campus and will develop preventative therapeutic strategies to combat obesity and chronic diseases. The institute will be the first of its kind — a university-based center focused on human performance and nutrition science for optimizing health and performance. The institute will leverage research and expertise from several departments and colleges across the OSU system, including the College of Education and Human Sciences, Ferguson College of Agriculture, the College of Engineering, Architecture and Technology, Robert M. Kerr Food and Agriculture Products Center, College of Osteopathic Medicine and more.

The new Transportation Operation Facility will be a $16 million replacement facility for the existing facility at the northeast corner of Farm Road and Western. The new facility, which will be funded by grants, will be located on Lakeview Road next to the Clean Energy Fuel station. The facility will make it possible to service all OSU vehicles with 12 large service bays, bus and vehicle automatic wash bays, space for fleet vehicle rentals, a fueling station and offices. The project was bid in the fall of 2021 and completed in the fall of 2022.

Research
As a land-grant university, Oklahoma State University is a leader in research of all kinds with the facilities to make that possible. ENDEAVOR (https://ceat.okstate.edu/endeavor/) opened in fall 2018. The 72,000-square-foot lab in the College of Engineering, Architecture and Technology (https://ceat.okstate.edu/) is the only one of its kind in the U.S. and is dedicated to immersive undergraduate learning experiences. It’s the glass-and-steel embodiment of a new era in undergraduate engineering learning, where walls no longer exist between disciplines, and individual expertise is melded into interdisciplinary teams. Donors paid for more than half of the $35 million cost to build it, and students changed their fees to ensure it would be staffed, accessible and open for their innovations.

The impressive Henry Bellmon Research Center (https://news.okstate.edu/articles/communications/2011/osu-dedicates-henry-bellmon-research-center.html) opened in 2010. The $70 million building, the largest project in the state’s Capitol Bond Program, provides state-of-the-art laboratory space for a wide range of disciplines and encourages collaborative research. In spring 2015, OSU opened the Bert Cooper Engineering Laboratory (https://go.okstate.edu/undergraduate-academics/majors/civil-engineering.html) for structures and materials engineering with new geothermal systems for energy efficiency.

The grand opening of EXCELSIOR (https://news.okstate.edu/articles/engineering-architecture-technology/2019/ceat_celebrates_grand_opening_of_excelsior.html), an unmanned systems innovation laboratory, was celebrated on Nov. 2, 2019. The new lab houses multidisciplinary research and education programs for the Unmanned Systems Research Institute in the College of Engineering, Architecture and Technology. The facility offers a recognized emphasis in instruction and research in unmanned aircraft systems and supplies hands-on analysis, design, construction and flight testing of UAS platforms. Students focus on projects that include flight testing and operations. Research opportunities include UAS design, aerodynamics, flight path management and airspace integration, sense and avoid, controls, structures, aeroacoustics, propulsion, communications and operations, and sensors and payloads.

The Boone Pickens School of Geology (https://geology.okstate.edu/) dedicated the new Gary F. Stewart Core Research Facility in November 2019. The facility serves as a “one-stop shop” for treatment, storage and analysis of core samples (cylindrical rock samples obtained by drilling), a needed service in the region. The building includes a grinding and polishing lab, thin section preparation, an area designated for coloring, porosity and permeability, significant layout and review space, as well as office space and a conference room. More than a repository, the facility houses active research. It is located in the northwest section of campus, near the corner of McElroy Road and North Willis Street.

Academics
Providing the quality facilities for a foundation of success for our students is an overarching goal at Oklahoma State University. From smaller renovations to update buildings to constructing new facilities, academic buildings are well cared for as part of the overall building plan.

The McKnight Center for the Performing Arts (https://mcknightcenter.org/Online/default.asp?doWork:WSContent:loadArticle=Load&BOParam::WScontent::loadArticle::article_id=C22E-484B-84A0-6454E9B59213) is a world-class epicenter for the arts, attracting celebrated national and international programs featuring notable productions and artists. The New York Philharmonic opened McKnight’s 2019-2020 season. The center will allow the university and the center’s supporters to express — and be recognized for — their passion for the arts on a global stage. The 93,000-square-foot facility opened in 2019 along the southwest corner of University Avenue and Hester Street, boasting 1,100 seats in the Performance Hall and 250 in the Recital Hall. The 1,000-seat outdoor plaza features a massive, high-definition screen that can show events taking place inside the Performing Arts Center or telecasts from around the world.

The Michael and Anne Greenwood School of Music (https://music.okstate.edu/) is a premier music education facility that harnesses the synergy of research, talent and incomparable hands-on learning experiences available only at OSU. The building opened in spring 2021, thanks to lead donors Michael and Anne Greenwood. The Greenwood School of Music’s proximity to The McKnight Center for the Performing Arts (https://mcknightcenter.org/Online/default.asp) will amplify and leverage opportunities, including master classes for students and faculty to interact with world-class musicians. Music laboratories, classrooms and teaching studios will be equipped with the latest technology for high-level studio production.

The new Ray and Linda Booker OSU Flight Center (https://news.okstate.edu/articles/education-health-aviation/2020/osu-announces-new-ray-linda-booker-flight-center.html) is a $6 million replacement facility that will serve as a premier resource for students pursuing degrees in aviation education. The 11,600-square-foot facility opened in spring 2022 and includes private rooms for individual flight debriefings between students and flight instructors. Additional advances to the student learning experience include space for state-of-the-art simulator technology, dispatch space and student common areas.

The Roger J. Panciera Education Center is a new $6 million building at the College of Veterinary Medicine (https://vetmed.okstate.edu/). Its designated classroom facilities have elevated the educational experience
for students. The addition includes three flexible classrooms and makes room for specialized training in existing instructional space. The new and enhanced teaching facilities support modern teaching methods and cutting-edge technology critical to the successful recruitment and training of students, faculty and staff.

The Division of Agricultural Sciences and Natural Resources new Greenhouse Learning Center (https://agriculture.okstate.edu/departments-programs/lha/student-resources/greenhouse-learning-center.html) opened in August 2019 and serves students in OSU’s Ferguson College of Agriculture in a new facility that will better prepare them to enter the professional workforce. The Greenhouse Learning Center, a $6 million facility, will replace and improve functions of OSU’s existing teaching greenhouses that have been in use for decades. Greenleaf Nursery, one of North America’s largest wholesale nursery growers and longtime partner and supporter of OSU’s horticulture programs, has committed $1 million toward this new project. The Greenhouse Learning Center features six greenhouses, including an isolated entomology greenhouse, and head house, which includes a classroom, office space and plant-preparation area, as well as storage space for soil, equipment and chemicals such as fertilizer and pest-management materials. A large fryer will provide space for student club meetings. It also will house cutting-edge irrigation systems, intense climate and humidity control and other technology standards in today’s horticulture industry.

The new home for the Spears School of Business (https://business.okstate.edu/) on Hester Street opened in spring 2018. The $72 million building is unique in design and shape, a “Crescent Masterpiece” that brings all of Spears Business together for now and in the future. Spears Business is designed to promote collaboration and hands-on, experiential learning to best prepare graduates for success in the modern workplace.

The north wing of the Nancy Randolph Davis Building opened in fall 2016 and houses hotel and restaurant, design and other programs. Also in 2016, OSU opened a new veterinary medicine academic center and the Charles and Linda Cline Equine Teaching Center (http://afs.okstate.edu/about/facilities/equine/).

OSU opened several renovated buildings in 2009. Thanks to a gift from the Donald W. Reynolds Foundation, OSU doubled the size of its School of Architecture building. The Psychology Building, built as a women’s dormitory in 1933, was renovated to house seven departments from the College of Arts and Sciences. The North Classroom building, funded in part by the state’s Higher Education Capital Bond Program, opened on the north side of the Stillwater campus in 2009. The facility offers the latest in teaching technology and features an eco-friendly eatery.

Athletics

One of the most tradition-rich programs in college baseball has a state-of-the-art home. O’Brate Stadium (https://okstate.com/sports/2020/1/29/o-brate-stadium.aspx) features an expansive clubhouse and operations center, including a "training triangle" with an indoor facility, pitching lab and practice infield. The ballpark includes 3,500 permanent seats that can be expanded to 8,000 as needed.

The renovation of the west end of Boone Pickens Stadium (https://okstate.com/sports/2015/6/18/GEN_0618155302.aspx) created one of the premier collegiate football facilities in the country. The university also completed several athletic projects north of Boone Pickens Stadium.

OSU opened the Sherman E. Smith Training Center (https://okstate.com/sports/2015/3/17/GEN_2014010153.aspx) for indoor training and a new outdoor track in 2013. The Michael and Anne Greenwood Tennis Center (https://okstate.com/sports/2015/3/17/GEN_2014010160.aspx) opened in early 2014. The Greenwood Tennis Center features six indoor and 12 outdoor courts and is one of the leading collegiate tennis facilities in the country. It will host the 2024 NCAA Tennis Championships.

Gallagher-Iba Arena (https://okstate.com/sports/2015/3/17/GEN_2014010157.aspx) continues to be a staple of athletics at OSU.

OSU also has an eye on comfortable and convenient living, ranging from residence halls and transportation to incorporating art into the campus. The university has been on the forefront of replacing outdated residential halls with apartments and suite-style accommodations for nearly two decades. Multiple upgrades have opened, giving on-campus students new opportunities for better living and community within the halls.

The Division I Golf Championships, most recently in 2018. The facility is in the regular rotation to host NCAA Regional Championships as well.

Life

OSU also has an eye on comfortable and convenient living, ranging from residence halls and transportation to incorporating art into the campus. The university has been on the forefront of replacing outdated residential halls with apartments and suite-style accommodations for nearly two decades. Multiple upgrades have opened, giving on-campus students new opportunities for better living and community within the halls.

The University Commons (https://offcampushousing.okstate.edu/property/view/listingid/311274/), a traditional-style residence hall, opened for the fall 2015 semester. Located north of the Colvin Center on Hall of Fame Avenue, the facility was enhanced a year later with the nearby North Dining Facility, which features seven distinctive dining choices that offer a focus on healthy, fresh options.

Packing and Transportation (https://parking.okstate.edu/) have also seen significant changes in recent years. The Multimodal Transportation Terminal and 1,100-space Monroe Street Garage opened in the fall of 2009. The facilities provide a central point of contact for the various modes of transportation serving OSU-Stillwater and its branch campuses, as well as the community and surrounding areas. OSU has added two more multilevel parking garages — the Wentz Lane Garage opened on the southwest corner of campus in the spring of 2013, and the Fourth Avenue Garage opened in fall of 2016 adjacent to the McKnight Center for the Performing Arts. OSU has expanded campus bus service for both the Stillwater community and the OSU-Stillwater campus. To reduce energy costs and emissions, OSU converted its entire fleet of campus buses to compressed natural gas in 2010.
From stunning sculptures enlivening the Stillwater campus of OSU to striking landscaping designed to welcome one and all, art is taking its place in the public realm — some of it in America’s Brightest Orange. The university has seen the installation of pieces from renowned sculptor Allan Houser (https://news.okstate.edu/articles/communications/2018/allan-houser-sculpture-gift-elevates-osus-public-art-initiative.html); yearlong exhibitions by Bill Barrett (https://news.okstate.edu/articles/communications/2019/mcknight-center-statue-dedication-ceremony-set-for-friday.html); the commemoration of Nancy Randolph Davis (https://news.okstate.edu/articles/communications/2019/osu_honors_civil_rights_pioneer_nancy_randolph_davis.html), the first African-American to attend the university when it was Oklahoma A&M College; and many more. The sculptures co-exist with the brick-and-mortar architectural landscape and integrate art into everyday life. OSU opened its Postal Plaza Gallery in 2014 as the home of the OSU Museum of Art (https://museum.okstate.edu/), showcasing the university's extensive art collection and strengthening its connection to downtown Stillwater.

**Infrastructure**

OSU completed work on a state-of-the-art Central Plant to replace its inefficient 1940s power plant. The facility reduces OSU’s environmental footprint, saves energy costs and features a 60-person classroom.

The first phase of a campuswide electrical upgrade project across campus has also been completed. The upgrade replaced aged underground piping and cabling that served many buildings’ electrical power. In addition to the underground infrastructure, Facilities Management (https://fm.okstate.edu/) has completed a new power distribution center, otherwise known as the PDC. The PDC acts as an indoor switching station between two OG&E substations that allows power to be distributed throughout campus. These infrastructure projects provide more capacity, offer better resiliency, and renew the life of the electrical system serving campus for decades to come.

OSU is a leader in network computing resources. The university has applied the student technology fee in concert with other resources to create a second-to-none networking system on campus that includes maintenance of large-scale computer laboratories, high speed inter-laboratory connectivity and a virtually seamless interface to the internet across campus.

Improvements continue in the university’s outdoor spaces as well, and a landscape architectural master plan (https://fm.okstate.edu/landscape-services/site-files/docs/osu_landscape_master_plan_2012-1.pdf) developed in 2010 is guiding those efforts. Major east-west streets Hall of Fame Avenue and University Avenue have been greatly updated, and the university has completed a total redesign and reconstruction of Monroe Street, which runs north-south through the heart of the campus. A series of landscape projects near student residential facilities have occurred in recent years. In the summer of 2005, the Edmon Low Library plaza was restored by installing a new surface on the main upper plaza and the lower area. Completed in 2013, Legacy Walk provides a scenic pedestrian thoroughfare in front of the library, connecting to Hester and Monroe streets. In the fall of 2016, OSU unveiled an impressive Welcome Plaza (https://news.okstate.edu/articles/communications/2018/osu-wins-keep-oklahoma-beautiful-award-welcome-plaza.html) outside the southeast corner of the Student Union. The plaza is an inviting garden area featuring statues of a galloping mare and her foal.

Recent improvements include preparing the iconic Theta Pond for the next 100 years of graduation photos. The large bridge and all three small bridges have been replaced with stone bridges and exquisite landscaping. A sculpture has been added to the southeast side of the pond.

**Other facilities of note**

Lake Carl Blackwell (https://lake.okstate.edu/), located 8 miles west of Stillwater, is owned by OSU. The area includes approximately 3,350 acres bordering the 3,000-acre lake that provides the water supply for OSU. It is also used for research activities in addition to being a popular regional recreational area.
